DUST

Dust accumulations on ceilings, rafters, trusses, pipes, walls, machinery and electrical equipment can present any one or more of the following problems:

- → → **Flash Fire Hazards**
 - → → **Air Quality Problems**
 - → → **Quality Control Problems**
 - → → **Machine Operating Problems**
 - → → **Electrical Equipment Problems**
 - → → **Unpleasant and, in some cases, potentially unhealthy working environments**
- Our versatile, flexible cleaning services can help you avoid interfering with your normal operations. We can help you solve all the problems associated with the jobs – Supervision – Manpower – Equipment – Quality - etc.

We have successfully completed large and small jobs in Printing Plants, Injection Molding Plants, Metal Fabricating Plants, Food Plants, Wood Working Plants, Carbon Black Plants, Warehouses, Clean Rooms, etc.

SURFACE MAINTENANCE SERVICES will give you a complete detailed estimate, based on a thorough analysis of the tasks to be done. We will make specific recommendations regarding the clean ability and paint ability of areas.
