RE: Performance of SMS

I am the plant manager for Trostel's Whitewater compounding facility. I have worked with Surface Maintenance Services for the five years that I have been with Trostel. I have utilized SMS to paint the interior of our entire facility and to clean it several times. SMS always meets or exceeds my expectations and is able to do the work at a very competitive price.

I appreciate the quick response that I receive from SMS when I have a problem. There have been several times that I have had need of their services with very short notice. Every time they were able to accommodate my schedule. Their employees are always very professional when working in my facility and do a good job. They always make sure that I am satisfied before they leave the job site.

Whenever I have a painting or cleaning job that I can't do with my own employees, SMS is the company I call to do the job.

Thank you,

Jayson Irwin
